1. Turbine wheel is made from fresh high nickel (>73%) alloy.
2. Compressor wheel goes through heat treatment to improve strength and relieve stress.
3. All wheels are balanced with Schenck automatic balancing center with air bearing to achieve lowest residual.
4. Piston rings are of the best quality from UK.
5. All bearings and collars are off the same production line for major international brands.
6. Cartridge is balanced with TurboTechnics VSR at 120,000 RPM.
7. Automated production line with on-line computerized inspections to ensure superior quality of every process.
